

Main Features

Home Page

- Web App introduction
- 1. Register
- 2. Login

Dashboard

- 1. Create whiteboard
- 2. Edit whiteboard name
- 3. Save whiteboard
- 4. Delete whiteboard

Post-it Workspace

1. Add (Create) post-it

2. Edit post-it

- 1) Adjust font size
- 2) Change font color
- 3) Change background color
- 4) Set post-it order
- 5) Upload image on post-it
- 6) Resize post-it
- 7) Drag and drop post-it

3. Syncing

- 1) Avoid race condition: Post-it LOCKED for other users while main user edits
- 2) Real-time syncing: syncs on different browsers after editing post-its
- 3) Record saving: Saves whiteboard for invited guest users on their own dashboard

4. Co-work

- 1) Invite guest users: by sharing invitation link
- 2) Show collaborators' detail: show online head-counts/ names and notifies when users are joined in the same whiteboard
- 3) Show online status: shows green light when user is online; grey light when idled for over 20 mins
- 4) Anonymous co-working: allows users who aren't registered to co-work on the same whiteboard in order to gain convenience ( an anonymous character name from MARVEL is given)

5. Add template

- 1) Provide templates: Common templates for user/ market/ business decision analysis are provided
  - a) Business Model Canvas
  - b) Persona Template
  - c) Empathy Map
  - d) Story board
- 2) Categories

6. Export Whiteboard
